Resume Summary

Driven and goal-oriented individual with a background in BBA (Computer Application) and currently pursuing MCA with a focus on Management. I combine strong business sense with technical skills in tools like SQL, and Java. Known for being confident, energetic, and strategic — I enjoy solving problems, improving efficiency, and turning ideas into action. Looking to grow as a Salesforce Developer in a reputed organization where I can make a real impact.

Education

Master's in Computer Applications – Management (2024-present)
* MIT-World Peace University
* **CGPA 8.15**

Bachelors in Business Administration - Computer Application (2021-2024)
* Modern College of Arts, Commerce & Science with **A+** grade
* **CGPA 9.49**

Projects

Local Guide Android Application [Github]
Tech Stack: Java, Android Studio, SQLite, Google Maps API
Description: Developed a mobile application to help travelers and newcomers explore cities efficiently. The app provided categorized listings for tourist places, food spots, shopping centers, and contact info. Integrated Google Maps API for real-time navigation and SQLite for offline data storage.
Key Features: Search and filter locations by category.User profiles with favorites and feedback. Admin panel for managing locations and user feedback. Implemented responsive UI/UX using Material Design. Role: Lead Developer (UI/UX + Backend) Outcome: Improved travel planning efficiency and received positive user feedback in demo trials.

Amazon Clone [Demo]
Tech Stack: HTML, CSS, JavaScript
Built a responsive e-commerce clone of Amazon with product listing, cart, and checkout UI. Designed interactive front-end using HTML5 and CSS3 for a real-world shopping experience. Implemented JavaScript for dynamic content rendering and user interactions.

Portfolio Website [Demo]
Tech Stack: HTML, CSS, JavaScript, GitHub Pages
Designed and deployed a personal portfolio to showcase skills, projects, and achievements. Implemented responsive design for cross-device compatibility. Hosted on GitHub Pages with continuous version control via GitHub.

Car Service Management System [Github]
Tech Stack: Java, MySQL, JDBC
Developed a desktop-based application for managing car services, customers, and billing. Integrated MySQL database with Java for efficient CRUD operations. Implemented authentication and role-based access (admin/user).
